

# Health Care

Staying well is important, and services don't come any better than Sumter's regional health care system. Our hospital features a full range of services, and Sumter is also home to the VA Outpatient Clinic and many home health care options. Our senior living facilities offer a continuum of care from independent living to skilled nursing.

For more than 100 years, Tuomey Healthcare System has been synonymous with quality health care, providing acute care, outpatient services and a comprehensive health promotion and disease prevention program. The system is anchored by Tuomey Regional Medical Center, a 266-bed JCAHO-accredited institution delivering the industry's most advanced technological care. Tuomey's active medical staff consists of more than 150 physicians, representing more than 25 medical specialties. Tuomey also includes a 36-bed nursery, an expanded ICU, 10 operating suites, an Outpatient Surgery Center, an award-winning Day Surgery unit and a satellite medical park. Tuomey's diagnostic and treatment capabilities include a medical oncology program, Cancer Treatment Center, cardiac catheterization and updated Hi-Speed Computed Tomography.

Transitional care is provided via Tuomey Home Services, along with a Subacute Skilled Care program.

Sumter also offers independent and assisted living communities dedicated to meeting the challenges of life that often come with growing older. Among them are:

- ◆ **Alterra Sterling House:** Specialized services from daily assisted living to Alzheimer's care in a warm, home-like environment. Life enrichment programming maximizes quality of life.
- ◆ **Covenant Place:** A warm, inviting continuing care community devoted to the needs of senior adults. Independent living, assisted living and a health care center reflect the elegance of Southern charm and a neighbor-helping-neighbor philosophy.
- ◆ **Morningside Assisted Living:** Assistance with day-to-day tasks, maximum privacy and independence, in a setting that maintains physical, emotional, spiritual and intellectual quality of life.
- ◆ **McElveen Manor:** A family operated residence featuring personalized care, where residents are encouraged to enjoy life to the fullest of their capabilities.
